Index to Volume XI (1974)

The number in parentheses following the title indicates the issue in which the article will be found; the final number indicates the page.

Biller, J. D., P. J. Olson and T. Breen. The effect of "happy" versus "sad" music and participation on anxiety; (2) 68.

Duerksen, G. L. Some current trends in music education: Implications for music therapy; (2) 65.

Eagle, C. T., Jr. and S. A. Prewitt. A computer-assisted information retrieval system in music therapy: A word-and-author index of published studies; (4) 181.

Eisenstein, S. R. Effect of contingent guitar lessons on reading behavior; (3) 138.

Galloway, H. F., Jr. and M. F. Bean. The effects of action songs on the development of body-image and body-part identification in hearing-impaired preschool children; (3) 125.

Galloway, H. F., Jr. Stuttering and the myth of therapeutic singing; (4) 202.

Goolsby, T. M., Jr., R. B. Frary and M. M. Rogers. Observational techniques in determination of the effect of background music upon verbalizations of disadvantaged kindergarten children; (1) 21.

Greer, R. D. Contributions of the psychology of music to music education and music therapy; (4) 208.

Hadsell, N. A sociological theory and approach to music therapy with adult psychiatric patients; (3) 113.

Hanser, S. B. Group-contingent music listening with emotionally disturbed boys; (4) 220.

Hollander, F. M. and P. D. Juhrs. Orff-Schulwerk, an effective treatment tool with autistic children; (1) 1.

Johnson, J. M. and C. C. Zinner. Stimulus fading and schedule leaning in generalizing and maintaining behaviors; (2) 84.

Jorgenson, H. The use of a contingent music activity to modify behaviors which interfere with learning; (1) 41.

Lathom, W. Application of Kodály concepts in music therapy; (1) 13.

Lathom, W. Report on a workshop on physical and neuropsychological foundations of music, August 14–18, 1973, Ossiach, Austria; (3) 135.

Madsen, C. K. No one knows research but me; (4) 169.

McMullen, P. T. The influence of complexity in pitch sequences on preference responses of college-age subjects; (4) 226.

Metzler, R. K. The use of music as a reinforcer to increase imitative behavior in severely and profoundly retarded female residents; (2) 97.

Michel, D. E. and N. H. May. The development of music therapy procedures with speech and language disorders; (2) 74.

Miller, D. M., L. Dorow and R. Douglas Greer. The contingent use of music and art for improving arithmetic scores; (2) 57.

Ragland, Z. and M. Apprey. Community music therapy with adolescents; (3) 147.

Schiff, M. and A. Frances. Popular music: A training catalyst; (1) 33.

Sears, W. W. and M. S. Sears. Japan: A new frontier for music therapy; (2) 81.

Underhill, K. K. and L. M. Harris. The effect of contingent music on establishing imitation in behaviorally disturbed retarded children; (3) 156.
